Data-Driven Generative Art Using processing.py

Allison G. Martínez-Arocho

About Me

- Born and raised in Puerto Rico

About Me

- Born and raised in Puerto Rico
- B.S. Computer Science

About Me

- Born and raised in Puerto Rico
- B.S. Computer Science
- Software Engineer at IBM

About Me

- Born and raised in Puerto Rico
- B.S. Computer Science
- Software Engineer at IBM
- I like cats

About Me

- Born and raised in Puerto Rico
- B.S. Computer Science
- Software Engineer at IBM
- I like cats
- Notorious for telling bad jokes

Generative Art

- … is any art practice where the artist creates a process, which is then set into motion with some degree of autonomy contributing to or resulting in a completed work of art.

Generative Art

- ... is any art practice where the artist creates a process, which is then set into motion with some degree of autonomy contributing to or resulting in a completed work of art.

    -Philip Galanter

Data-Driven Generative Art

- Created with processes that are informed by data

Data-Driven Generative Art

- Created with processes that are informed by data

- Does not necessarily have to communicate anything about the data used to generate it

Processing

- Programming language, and development environment

Processing

- Programming language, and development environment

- Has promoted software literacy within the visual arts and visual literacy within technology

Processing

- Programming language, and development environment
- Has promoted software literacy within the visual arts and visual literacy within technology
- Originally released with a Java-based syntax

Processing

- Programming language, and development environment

- Has promoted software literacy within the visual arts and visual literacy within technology

- Originally released with a Java-based syntax

- Now has several alternative programming interfaces: Python, JS, Ruby

APIs in a nutshell...
a very small nutshell

- Take advantage of HTTP methodologies:
  - GET, PUT, POST, DELETE

APIs in a nutshell...
a very small nutshell

- Take advantage of HTTP methodologies:
  - GET, PUT, POST, DELETE
- For today, we only need to understand:
  - GET requests, which are used to retrieve resources

APIs in a nutshell…

Let's get ready to make art!

- Go to:
  https://github.com/arocho/generative-art

- Or go to the PyCaribbean Slack #gen-art channel
- Install Processing, and open the pc_ws.pyde file

Let's get ready to make art!

- Go to:
   https://github.com/arocho/generative-art

- Or go to the PyCaribbean Slack #gen-art channel
- Install Processing, and open the pc_ws.pyde file
- Let's mess with the file, and make something new.

   SHARE!

THANKS A BUNCH!
